

SARS COV 2 RT-PCR

Patient Name Anibal Hugo

Patient DOB 07/10/1993

Date of Service Nov 9, 2021

Location Uniondale – 1345 Rxr Plaza, Uniondale, NY, 11556-1301

Questions? If you have questions about your results, please contact your provider's office. If you are unsure of your provider's office number, contact the Summit Health call center at 908-273-4300. If you were seen at a CityMD, call 844-824-8963.

Result details

NAME	VALUE	REFERENCE RANGE
sars-cov-2, NAA	not detected	Normal range: not detected

This nucleic acid amplification test was developed and its performance characteristics determined by LabCorp Laboratories. Nucleic acid amplification tests include RT-PCR and TMA. This test has not been FDA cleared or approved. This test has been authorized by FDA under an Emergency Use Authorization (EUA). This test is only authorized for the duration of time the declaration that circumstances exist justifying the authorization of the emergency use of in vitro diagnostic tests for detection of SARS-CoV-2 virus and/or diagnosis of COVID-19 infection under section 564(b)(1) of the Act, 21 U.S.C. 360bbb-3(b) (1), unless the authorization is terminated or revoked sooner.

When diagnostic testing is negative, the possibility of a false negative result should be considered in the context of a patient's recent exposures and the presence of clinical signs and symptoms consistent with COVID-19. An individual without symptoms of COVID-19 and who is not shedding SARS-CoV-2 virus would expect to have a negative (not detected) result in this assay.
